NCWSC SEALS DEAL WITH WSUP

NCWSC Ag. Managing Director Eng. Nahason Muguna and WSUP Country Programmes Manager Kariuki Mugo during the signing of the M.o.U at Kampala Rd.

The Company has signed a Memorandum of Understanding (M.o.U) with Water and Sanitation for the Urban Poor (WSUP) to support development of sustainable, equitable and affordable water and sanitation services in Nairobi City County.

Water and Sanitation for the Urban Poor, the not-for-profit Limited company shall work with NCWSC to continuously seek funding to implement projects and provide pro-poor services capacity support in its area of jurisdiction.

During the roll-out of the pact, WSUP is expected to conduct assessment of utility and private sector business capacity and policy environment for the purposes of capacity development support particularly for the bottom of pyramid customers as well as stakeholder interests in project implementation, operation and maintenance to improve service delivery sustainability.

The major activities to be undertaken by NCWSC are offering technical support and capacity building on NCWSC plans, policies, procedures and standards and supporting introduction and adoption of better and more efficient technologies for water and sewerage/sanitation services, delivery and scaling -up plans in selected low income settlements across the city among others.

NCWSC PARTNERS WITH WORLD WATERNET

NCWSC Staff and delegates from the World Waternet pose for a group photo at Kampala Road.

The Company entered into a partnership with World Waternet in the field of drinking water and sanitation under the WaterworX Program. The deal seeks to focus on three key areas namely Organization and People, Water and Finance

WaterworX is part of a Water Operators Partnership where utilities enter into a partnership with the intention of peer-to-peer learning as well as facilitate access to water services for 10 million people. There are 55 WOPs in the WaterworX program where Kenya has three based in Nairobi, Homabay and Naivasha respectively.

NCWSC has formed a working steering committee that will directly contribute to the success of the project comprising of Informal Settlement Region, Non-Revenue Water Engineering Departments and Planning Monitoring and Evaluation Departments.
